Aida is a PhD student in Materials Science and Engineering at Michigan State University. Aida is Tunisian and lived her life until the age of 19 in Tunisia (North Africa). Like all her compatriots, Aida learned Arabic, French and English in primary school and high school.

She lived three years in France to finish her studies in mechanical engineering. Aida is in the United States of America for three years now. She is interested outside of the scope of her scientific research, in teaching Arabic and French and appreciates the interaction with students in the ILO within RCAH. She is fascinated by the issues of transitional justice, education and conflict resolution in African countries.
