Danilo Balzarini is an Italian, 24-year-old engineer.

He loves the USA and is proud of his native country, Italy, where he grew up, played many sports (such as swimming, athletics, martial arts, soccer) and studied until his engineering degree.

Then, in order to broaden his personal and academic horizons, in 2014 he took the opportunity to work for one semester at the Department of Civil and Environmental Engineering at MSU.

This experience was so important to him that he wanted to continue it by accepting a position as a PhD student.

Danilo cares very much about the relationship with others.

Joining the ILO program of Italian language has given him the opportunity to teach his native language and to deepen the knowledge and the relationship with the US society.
